Language

English B2+

Professional Experience

Tehzor	**06.2021 – present**

Position: Backend Developer

Projects: Automation of construction control, Labs crm

Responsibilities included:

As a developer, I have had the opportunity to work on several projects that involve creating new products in support of old products.
In my experience, creating new products in support of old products requires a deep understanding of the existing product and its limitations. It's important to identify the gaps or areas for improvement in the existing product and then design new features or products that can address those gaps. This requires strong analytical skills and the ability to think creatively to come up with innovative solutions.

Environment: Nestjs, postgresql, typeorm, mongodb, mongoose, rabbitMq, webSockets, jest, keycloak, firebase, docker, jenkins, kubernetes, AWS, jira, git

Fresh Lime Soft LLC   **01.2020 – 04.2021**

Position: Full Stack Developer

Project: *Admin panel for management accounting system*

Responsibilities included:

Successfully maintained the project by troubleshooting and fixing bugs, optimizing code, and ensuring smooth functionality, while also developing new features and functionality and handling large data sets. Additionally, utilized statistical analysis to improve performance metrics for personnel managers.

Environment: Nodejs**,** Express, Mongodb, *React, Redux, Axios, typescript, Material UI, styled-components, react-hook-form, jest, git*

Epam (trainee)   **09.2019 – 01.2020**

Position: Backend Developer

Project: Venue management platform

Responsibilities included:*.*

Software development projects, participating in testing activities, contributing to project documentation, and continuously learning and improving my technical skills. I collaborated with different team members, assisted with code review and bug fixing, and actively engaged in training programs to enhance my knowledge and expertise in software development

Environment: c#, asp.net, ms sql server, dapper, xUnit, javascript, html, css, *git*
